DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Rao (USPN 5,761,694).

Rao discloses the claimed integrated circuit that integrates a plurality of functional blocks (203a, 203b, 201a, 201b) within a single semiconductor chip (Figure 2), comprising: a plurality of decoding circuits (204a, 204b) within said semiconductor chip, for which address lines and data lines are connected to an input terminal, an address signal inputted from said address lines is decoded, and the data inputted from said data lines is outputted according to the results of the decoding; and signal lines with a few bits including said address lines and said data lines, wherein said signal lines are wired to said plurality of the decoding circuits.

Allowable Subject Matter

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: prior art references do not teach or render obvious an integrated circuit in a

single semiconductor chip wherein the plurality of the decoding circuits are arranged in the same number of the plurality of functional blocks.
